

Aqua Star CA

Filter Cartridge for Particle & Bioburden Reduction

Membrane Filter Cartridges

Description

Aqua Star CA filter cartridges feature a high-performance, single-layer pleated cellulose acetate membrane. Specially developed for filtration of carbonated mineral water and non-carbonated drinks. Aqua Star CA filter cartridges guarantee the highest biological product safety in combination with an enhanced total throughput performance. Aqua Star CA filter cartridges are the ideal choice for filtration in the food and beverage industry.

Application

Aqua Star CA membrane filter cartridges are used for final filtration prior to bottling for products, such as the following:

- Carbonated mineral water
- Non-carbonated water
- Near-water beverages

Product Performance

Aqua Star CA filter cartridges incorporate a specially designed cellulose acetate membrane. This new cellulose acetate membrane has been developed to meet the demanding process requirements in terms of pressure pulsation and sterilization cycles in the food and beverage industry. In combination with an optimally designed prefilter, Aqua Star CA filter cartridges achieve maximum total throughput, and minimize filtration costs.

Integrity-testable

The integrity of Aqua Star CA membrane filters cartridges can be easily checked by performing an integrity test before and after filtration to guarantee the highest biological safety.

Quality

Aqua Star CA membrane filters are designed and manufactured according to an ISO 9001 certified quality management system. All materials used in the construction of Aqua Star CA meet FDA requirements for the use in food and beverage applications.
